

EDUCATION FUNDING

Our government must change course

Image source: iStock.com/fatCamera

Dear _____ , MLA

Public school parents and teachers believe that funding for special education should be based on students' actual needs rather than the proposed statistical prevalence funding model.

While public education funding is being reviewed and teacher bargaining is under way, I am asking you to speak up in caucus now to help make sure the new contract works for students with special needs and their teachers.

Sincerely, _____
